Y18 specification sheet

Y18 · Compact 4G Hardwired Tracker

Updated 11 November 2026

Key features

Four-wire installation with an ACC input for vehicle ignition status.

Power-disconnection and vibration alerts, with overspeed and geofence functions enabled through configuration.

Store-and-forward reporting for data recorded outside network coverage.

Technical specifications

Cellular network	4G
Power supply	External vehicle power
Installation	Hardwired connection through the vehicle wiring or fuse box
Operating voltage	DC 9-90 V
Dimensions, L × W × H	80 × 37 × 15.4 mm
Positioning	GPS / BeiDou / GLONASS / cellular positioning
Communication protocol	GT06
Backup battery	55 mAh
Net weight	45 g
Operating temperature	-10°C to +60°C

Installation and configuration

Check the vehicle voltage, fused power connection and mounting position before installation. Select the modem variant and SIM for the destination network. Alert delivery and commands depend on the device configuration and connected software.

Alert and reporting functions depend on the selected configuration. Check ACC wiring and vehicle power before installation.

Specifications apply to the described product versions. Confirm the actual configuration before ordering or installation.
